

MDRM

Patient Centric eHealth Technology
Impact investing that changes lives.

Investor Presentation Q1 2024 Modern Mobility Aids, Inc.

Publicly traded, OTC: **MDRM**

Make a social impact where it matters most. People's health.

MD-RM innovates the traditional in-person doctor's visit, evolving it into a comprehensive virtual experience that maintains high-quality care standards. Our groundbreaking platform effortlessly combines online physician consultations with real-time streaming of patients' vitals. This not only allows doctors to listen to heart and lung sounds but also facilitates a high-definition examination of the ears, nose, and throat, ensuring prompt and precise care delivery. Our aim is to streamline the process and alleviate frustrations between consumers and professional healthcare providers.

We are pioneering a paradigm shift in healthcare delivery by bridging the physical gap between patients and healthcare providers.

Modern Mobility Aids, Inc. is publicly-traded in the United States on the OTC Markets Exchange.

Industry

Telehealth Technologies

The projected Global Telehealth market is expected to exceed \$867 billion by 2028, with a Compound Annual Growth Rate (CAGR) of 34.2% from 2024 to 2030. MDRM is strategically leveraging this opportunity by introducing its cutting-edge technology and services in the underserved markets such as Africa.

Our Services

We play a vital role in fostering telehealth innovation, driving technological advancements, and improving access to healthcare by offering the following services:

1. Technology: eHealth Platform;

Our adaptable AI assisted telehealth solution combines telehealth software, hardware, and medical devices, empowering healthcare organizations to provide virtual care across the entire care continuum. These telemedicine and telehealth products equip healthcare physicians with the tools necessary to treat individuals efficiently, accurately, flexibly, and comprehensively, irrespective of their location or circumstances.

2. Blockchain Electronic Medical Records (EMR)*

Blockchain Electronic Medical Records (EMR) represent a groundbreaking advancement in healthcare technology. By leveraging the power of blockchain technology, EMRs can ensure the secure and transparent storage of patient health records. The decentralized nature of blockchain enhances data integrity and privacy, reducing the risk of unauthorized access or tampering.

*Under Development

3.Education:

MDRM has developed a telemedicine educational initiative. Leveraging our proficiency in workflow, case presentation, and physician scheduling, we have crafted programs suitable for instruction at universities and colleges. These programs are designed to equip graduate students with "telehealth degrees or diplomas," preparing them for a career in the evolving landscape of eHealth healthcare.

4.Customization:

Our global team of specialists excels in crafting telehealth solutions that cater to distinct needs, considering cultural sensitivity and geographical nuances. These tailored solutions empower healthcare organizations to deliver effective care through advanced digital technology.

5. Access to Global Specialist For Second Opinions

A thorough re-evaluation of a patient's medical condition is conducted by highly specialized clinicians with expertise in specific subfields, all facilitated through our advanced platform. This comprehensive process involves in-depth analysis and examination by top sub-specialized professionals who leverage cutting-edge technologies and medical knowledge to assess every aspect of the patient's health.

6. Mentorship and Support

We provide ongoing support and guidance to the leadership teams in our portfolio. We offer advice, share our experiences, and help telehealth entrepreneurs navigate the various stages of company growth.

Strategic Emphasis: Bridging Healthcare Gaps through Targeted Market Focus

Our company's marketing strategy for telehealth is distinctly centered on addressing the needs of segments in the market that are currently underserved by the conventional medical system. We recognize the disparities in healthcare accessibility and aim to bridge these gaps by emphasizing telehealth solutions in regions where medical resources may be limited or difficult to access. By targeting underserved populations, we intend to democratize healthcare services, providing a lifeline to individuals who may face geographical, economic, or social barriers to traditional medical care. Through our tailored telehealth offerings, we aspire to enhance healthcare equity and extend quality medical services to those who need it the most, thereby contributing to the overall improvement of global health outcomes.

Top reasons why investing in telehealth can be a strategic and lucrative decision.

Growing market demand

The demand for telehealth services has been steadily increasing, driven by factors such as an aging population, rising healthcare costs, the need for convenient and accessible healthcare, and the advancement in technology. Investing in telehealth allows you to tap into a rapidly expanding market with substantial growth potential.

Addressing current healthcare challenges

Telehealth offers solutions to various healthcare challenges. It improves access to healthcare services, particularly for underserved populations, rural areas, and individuals with limited mobility. Telehealth also enhances healthcare delivery efficiency, reduces costs, and enables remote patient monitoring and personalized care. By investing in telehealth, you can contribute to addressing these challenges and improving the overall healthcare landscape.

Cost savings and efficiency

Telehealth has the potential to reduce healthcare costs significantly. By enabling remote consultations, monitoring, and diagnosis, telehealth can lower expenses associated with hospital visits, emergency room visits, and unnecessary medical procedures. It also improves operational efficiency by streamlining processes and reducing wait times.

Technological advancements

Telehealth leverages advanced technologies such as artificial intelligence, machine learning, remote monitoring devices, and mobile applications. These technological innovations enhance the accuracy of diagnoses, enable remote patient monitoring, facilitate personalized care, and improve overall patient outcomes. Investing in telehealth allows you to capitalize on the potential of cutting-edge technologies in healthcare.

Market consolidation and acquisition potential

The telehealth industry is experiencing a wave of consolidation and mergers. Established healthcare organizations are actively seeking partnerships and acquisitions with telehealth companies to enhance their service offerings and stay competitive. Investing in telehealth companies positions investor to benefit from potential acquisition opportunities and the increased valuation of successful telehealth ventures.

Social impact

Investing in telehealth allows investors to make a positive social impact by improving access to quality healthcare, particularly for those who face barriers to traditional healthcare services. It enables patients to receive care conveniently, promotes early intervention and preventive care, and can lead to better health outcomes. The social impact aspect of investing in telehealth can be fulfilling and align with socially responsible investment strategies.

It's important to note that while telehealth offers numerous advantages, investing in the sector also carries certain risks. As with any investment, thorough due diligence, market analysis, and a comprehensive understanding of the regulatory landscape are crucial before committing funds to telehealth ventures.

Investors should read our full forward-looking statements and Disclosures and contact their independent financial advisors and/or brokers to determine if an investment in the MDRM or the telehealth space is a good fit for their personal investment.

Forward-Looking Statements

The information contained in this document is provided by Modern Mobility Aids, Inc. (and/or the "Company") for information purposes only and does not constitute an offer to issue or arrange to issue, or the solicitation of an offer to issue or arrange to issue, or the solicitation of an offer to issue, securities of the Company or other financial products.

The information contained herein is not to be construed as investment advice. Each prospective investor should consult with their own independent advisor or investment, financial, legal and tax professionals. Any sale will be made pursuant to the terms of a subscription agreement with the Company.

No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this document. To the maximum extent permitted by law, none of the Company, its directors, officers, employees or agents, nor any other person shall be liable, including without limitation, for any liability arising out of fault or negligence for any loss arising from the use of or reliance on the information contained in this document, including but not limited to: the Company's business strategy, any estimate of potential earnings, the completion of any transaction including, acquisition or investments in other businesses, product development including technology platform development, sponsorships, joint ventures, core programming, technology licenses, process patents, partnerships, merger acquisitions or leases, distribution rights, events, courses of action, regulatory approvals in Canada and foreign jurisdictions.

Except for statements of historical fact, this document contains certain "forward-looking information" within the meaning of applicable securities laws. Forward looking information is frequently characterized by words such as "may", "plans", "seek", "expects", "projects", "intends", "believes", "anticipates", "estimates" and other similar words or statements that certain events or conditions may or will occur. Forward-looking statements in this presentation include, but are not limited to: general market conditions, the ability of the Company to execute on delivering a platform business, obtaining any regulatory approval if and/or when required from Health Canada, compliance with national and/or international data collection and/or privacy information, the ability of the Company to raise funds, the ability of the Company to complete its production of the healthcare platform ecosystem and/or business model, the anticipated revenue capacity of the platform, the quality, reliability and safety of the Company's website, the Company's ability to produce revenue, the Company's future expansion opportunities, projections as to number of producers and consumers and to the market in general, the competitive environment, the Company's innovation techniques, the use of proceeds and financial information. Forward-looking statements are based on the opinions and estimates of management at the date the statements are made and are subject to known and unknown risks and uncertainties and other factors that could cause actual events or results to differ materially from those anticipated in the forward-looking statements. Such risks include but are not limited to: the

impact of general market conditions, the inability of the Company to obtain regulatory approval if required from Health Canada, failure to comply with data and/or privacy laws, the ability of the Company to raise funds, the inability of the Company to complete production of the healthcare platform as set out herein, lowered revenue capacity of the platform, the quality, reliability and safety of the Company's platform, joint venture, partnership, sponsorship, licensing risks, changes in the existing laws relating to medical information or changes to the management team, operational and technology risks, the Company failing to produce the amounts of revenue set out herein, future expansion opportunities, projections as to the number of producers and/or consumers and to the market generally, assignment of a license number to enable drug plan reimbursement, fluctuations in costs, customer interests and risks related to competing in a highly competitive environment.

Except as required by law, the Company undertakes no obligation to provide additional information or to update any forward-looking information if circumstances or management's estimates or opinions should change. The reader is cautioned not to place undue reliance on forward looking statements.

Forward Oriented Financial Information. This document contains forward looking statements, including Future Oriented Financial Information ("FOFI") that relate to our current expectations and views of future events. The FOFI has been prepared by our management to provide an outlook of our activities and results and may not be appropriate for other purposes. Our management believes that the FOFI has been prepared on a reasonable basis, reflecting management's best estimates and judgments. An investor should read this document with the understanding that our actual future results may be materially different from what we expect.

Not for Distribution. This presentation and materials or fact of their distribution or communication shall not form the basis of, or be relied on in connection with any contract, commitment or investment decision whatsoever in relation thereto. No securities commission or similar authority in Canada or any other jurisdiction has in any way passed upon the adequacy or accuracy of the information contained herein. You should not rely upon this document in evaluating the merits of investing in our securities or for understanding our business.

Market and Industry Data. The information contained herein includes market and industry data that has been obtained from third party sources, including industry publications. The Company believes that its industry data is accurate and that its estimates and assumptions are reasonable, but there is no assurance as to the accuracy or completeness of this data. Third party sources generally state that the information contained therein has been obtained from sources believed to be reliable, but there is no assurance as to the accuracy or completeness of included information. Although the data is believed to be reliable, the Company has not independently verified any of the data from third party sources referred to in this presentation or ascertained the underlying economic assumptions relied upon by such sources.
